Backend
Spring Boot 3.5, Spring Security (JWT), REST APIs, Flyway

Databases
PostgreSQL, MySQL, MongoDB, SQLite, DBeaver

Testing
JUnit, Testcontainers, API testing, E2E, integration

DevOps
Docker, Docker Compose, Git/GitHub, GitHub Actions (CI/CD), WSL, Linux

Automation
Python (subprocess, os, requests), SQL/MongoDB queries, Odoo via XML-RPC

Methodologies
Scrum, Kanban, SAFe · Jira, Confluence

LANGUAGES

Spanish and Catalan
native

English
professional working proficiency (work experience in Ireland)

MAR AGRAMONTE

BACKEND DEVELOPER

JAVA · SPRING BOOT · POSTGRESQL · DOCKER

ABOUT ME

Backend developer, DAM graduate (higher vocational degree in multi-platform app development). My final-year project is an appointment app for a real internist's practice in Palma: Java 21, Spring Boot and PostgreSQL, with 115 automated tests and CI on every push. Before that, a 400-hour QA and API internship at Marlink Group. English at professional working proficiency, with work experience in Ireland. Open to Backend Developer or QA Automation roles, in Palma or remote.

EXPERIENCE & IT INTERNSHIPS

IT Internship — Development & QA Testing

Marlink Group (OmniAccess) · January 2026 – March 2026 · 400 hours

- Functional testing of the Ucopia API: test case design, bug reproduction and technical reports in Jira.
- End-to-end validation in simulated and production environments.
- Python scripts to automate SQL and MongoDB queries from Docker containers on WSL.
- Agile team using SAFe (Daily, Sprint Planning, PI Planning) with documentation in Confluence.

Internship — Technology Consulting

GladToLink · Feb. 2025 · 100 h · XML forms and Java to digitize processes

FEATURED PROJECTS

Medical Appointment Management App

DAM Final-Year Project · github.com/maragramonte/dr-agramonte

- Booking for a real internist's practice in Palma. Java 21, Spring Boot 3.5, PostgreSQL, JWT with roles and Flyway migrations.
- Pessimistic locking (SELECT FOR UPDATE) against double-booking, validated with a concurrency test (CyclicBarrier) on real PostgreSQL.
- 115 tests: 70 unit, 27 API and 18 integration with Testcontainers. CI with GitHub Actions on every push.
- Docker Compose and Caddy (HTTPS); notifications via email, Telegram and Twilio. Demo: maragramonte.github.io/dr-agramonte

Farmàcia Agramonte Website

- Live site for a real pharmacy: maragramonte.github.io/Farmacia-Agramonte
- Python generator that builds 190 pages in 3 languages (ES/CA/EN) from JSON.
- CSV importer from the pharmacy's management software: detects encoding and separator, and dry-runs before writing.
- Technical SEO (JSON-LD, hreflang, sitemap) with no external dependencies, compliant with medicine advertising regulations.
